completion	1999

Institute for Exploration

Lyons/Zaremba and a team of consultants developed and completed a master plan for what is now a world-class aquarium.

This expansion includes all new indoor exhibits, a spectacular, true-to-life outdoor Alaskan coast exhibit with Beluga whales and Stellar sea lions; the Institute for Exploration, featuring multimedia exhibits that spotlight strange deep sea life forms and shipwrecks such as the Titanic; a new entry/ticketing pavilion; and a new retail shop and a food-service facility.
