Coral Reef and Rotunda Renovation

THE JOHN G. SHEDD AQUARIUM

Chicago, Illinois

PROJECT FACTS

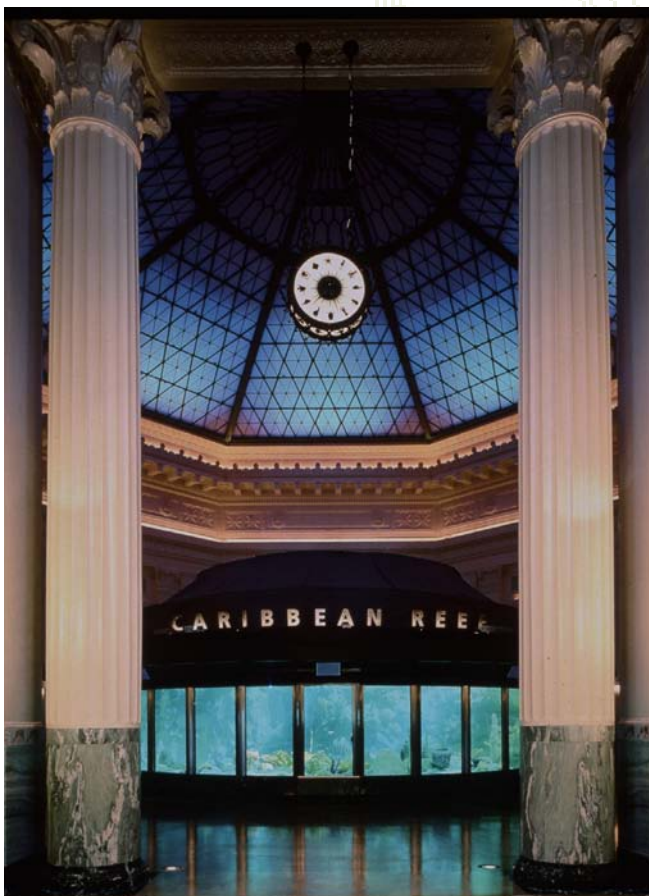

scope	Exhibit Planning and Design
size	5,000 SF
budget	\$1.5M for Exhibits
architects	EHDD Architects
completed	2000

Species Identification Labels

As part of the Shedd Aquarium's \$150,000,000 renovation and expansion project, Lyons/Zaremba worked with architects, engineers and the aquarium staff to design a new conceptual centerpiece for the expanded building—a new Caribbean coral reef and renovated rotunda. A major consideration was the need to respect the existing space and historical features of this established educational institution.

The team created a successful new coral reef habitat, interactive exhibit elements and a multimedia show about ecological “connectedness,” while maintaining and even celebrating Shedd’s long-standing architectural features.
